EDUCATION

Worcester Polytechnic Institute

Worcester, MA

Bachelor of Science in Computer Science, Minor in Interactive Media & Game Development (GPA 4.00)

Aug. 2022 - May 2025

SKILLS

Languages: TypeScript, JavaScript, GLSL/WGSL, HTML, CSS, Rust, C, C++, Python, Java, C#

Frameworks/Tools: AWS, Svelte, React, Next.js, Vue.js, WebGL/WebGPU, Express/REST, Figma, Penpot

Subjects: Full-stack web development, UI/UX design, data visualization, graphics programming, systems design

PROJECTS

Mint Editor (mint.photo) | *Svelte, Canvas*

Oct. 2025 - Nov. 2025

- Designed and built a fully featured digital compositor with support for transforms, selections, shapes, text, zooming, and keyboard-driven workflows
- Implemented a performant Svelte-based rendering architecture (canvas + DOM overlays), including custom tools, undo/redo, layer compositing, and save/load support.

Tile Music (tile.music) | *SvelteKit, Supabase, Postgres, BullMQ, Deno*

Aug. 2024 - Present

- Prototyped, built, and user-tested an application visualizing music listening habits from streaming activity.
- Built a pipeline (Munite) that ingests listening activity from major music streaming services and normalizes track metadata for downstream use.
- Transformed listening data into algorithmic album art visualizations with generated configuration interfaces.

Terrazzo (terrazzo.mosaiq.dev) | *React, Express, WebSocket, Postgres*

Aug. 2024 - Oct. 2025

- Used Agile strategies to collaborate within a large team to build a kanban-style product management platform.
- Delivered core features like the project landing page, GitHub integration, and real-time collaboration.

EXPERIENCE

Software Engineer (Contract)

2025 - Present

Various Clients

Remote

- Built full-stack features across startup and research contracts, including security analysis, user-facing product tooling, and distributed data analysis platforms.
- Developed a dynamic lead capture system for a small-business site builder, enabling custom question generation, editing, and end-to-end response handling.
- Developing a distributed analysis platform with an API, job queue, and execution pipeline to operationalize residential energy usage models given historic weather and energy use data.

Software Engineer (Volunteer)

Mar. 2025 - Apr. 2026

Mosaiq Software (mosaiq.dev)

Worcester, MA

- Designed and built full-stack creative tools and social platforms, including real-time and graphics-heavy web applications, image manipulation software, and game engines.

Application Security Researcher

Oct. 2025 - Nov. 2025

Doximity

Worcester, MA (Remote)

- Collaborated on pre-production penetration testing for a GPT-based API platform.
- Focused on GraphQL endpoint analysis, authentication boundaries, and rate-limiting evasion.
- Documented vulnerabilities and recommended mitigations related to access control, session handling, and fingerprint-based rate limiting.
